

ISR Summer School

July 1-July 26

ISR Summer School is a fantastic way to enrich your child's summer with engaging educational experiences led by native English speakers. We eagerly welcome both new students and current ISR students from Kindergarten to Grade 8.

Our program places equal value on academics and fun. From 9:00-12:00, students will be participating in highly engaging academic lessons. Our core subjects for Summer School are English, Math, and German.

From 13:00-15:30, students who participate in the full day program will be enjoying a wide variety of extra-curricular activities led by creative, passionate, and qualified teachers. In addition to our in-school activities, we will also go on a field trip every Wednesday!

This program will provide a preview of the activities, field trips, and weekly themes you can expect during the four weeks of ISR's 2019 Summer School.

Core Subjects

English:

Lessons offered to accommodate the needs of every student. Whether your student has strong English language skills, or is brand new to the language. Our qualified, native English-speaking teachers will provide them with the support they need.

Mathematics:

Our mathematics program aims to develop numerical understanding and logical thinking skills in a highly engaging and interesting way.

Science:

We offer interesting, exciting, and interactive science lessons daily. Students will learn through their hands-on involvement in a variety of teacher guided experiments.

German:

Qualified native German-speaking teachers will introduce new language skills fitted to each student's individual needs.

- ◇ STEM activities
- ◇ PE
- ...and more!

Field Trips

- ◇ Phantasia Land
- ◇ Bowling
- ◇ Climbing
- ...and more!

Weekly Themes

To guide our curriculum throughout the duration of Summer School, we have selected weekly themes. The themes are the same for all grade levels (KG-8) and are as follows:

WEEK 1: Who I Am

July 1st-July 5th

An exploration of ourselves, our core values, and our emotional, physical, and social well-being. We will be investigating our relationship with the world around us, our human rights and responsibilities, and what it means to be a part of the global community.

WEEK 2: How the World Works

July 8th-July 13th

An exploration of the natural world as we know it. Linking social studies and science, we will be investigating the relationship between the natural world and human societies throughout history.

WEEK 3: Expressing Ourselves

July 15th-July 19th

An exploration into the expression of self around the world. How do humans express their feelings, ideas, culture, and beliefs?

WEEK 4: Citizens of the Earth

July 22nd-July 26th

An exploration into our rights as human beings and the responsibilities we have to protect the resources we share with humans and all living things alike.
